The MiniVID eyepiece camera is available with an RCA output or USB connection. Plug it in to your TV, VCR, or computer. Then attach it to any microscope for instant video micrography. The innovative MiniVID eyepiece camera slips into any standard microscope eyepiece tube for crisp imaging in an instant. Or attach the miniature lens and drop it in the optional gooseneck stand for macro imaging. The MiniVID can focus as close as 1/4" out to infinity!

Item No.	Description
MV10R	MiniVID RCA
MV10U	MiniVID USB with software
MV-GN	Gooseneck holder

Our most popular version connects directly to most TV's and video projectors and can adapt to work with your PC as well.

The USB model is available for use with computers only. Capture live video clips, and insert images into Word and Excel!
